

# Intelligence of Positive Social Impact

## **The Intelligence of Positive Social Impact**

At Enterprise Care we are committed to helping build better organisations.

Better governed organisations foster community trust; achieve a more reliable and sustainable operation, increase opportunities for professional development and personal growth, and ensure people have a sense of belonging and personal engagement.

Through what we do we build a better environment and seek to work with and through positive values-based organisations and individuals.

Enterprise Care is committed to lifting the performance of more organisations, thereby positively impacting more people and ensuring they exist in a more rewarding environment.

Better governance means a better work environment means better local and personal communities.

## **Our Commitments**

Enterprise Care's commitments are to:

- Deliver market-leading products and services
- Innovate by offering value-creating solutions
- Offer practical solutions by understanding our clients' needs
- Respect and value our business partners
- Work collaboratively to create productive relationships.
